

# evacuation chair

## Product Information

The **EC2** evacuation chair is a universal evacuation solution for smooth stairway descent during an emergency. This single user operation ensures no heavy lifting or manual handling is required during any emergency evacuation situation. It is the perfect solution to ensure your business is compliant with Health & Safety and Fire Safety regulations. It is light weight and easy to use for people who are mobility impaired in the event of an evacuation of any multi-storey building. It is designed to comply with building stairway regulations.

### features of the EC2

### general overview

Your **EC2** is a foldable evacuation chair, which is designed to be wall mounted or to fit inside a wall mounted storage unit.

The **EC2** is designed for emergency escape down multiple flights of stairs.

The **EC2** is not designed for general everyday outdoor use

You will need a trained operator to unfold and control the **EC2** while travelling down stairs.
